CELMANAX™SCP	Available
MFP™Methionine	Available

Little Fly
BIG PROBLEM

High levels of copper. Do not feed to sheep.

Cattle should consume an average of 0.4 ounces of MLS #12 IGR Tub per 100 lbs. of animal body weight per day, which is equivalent to 4 ounces per day for a 1,000 pound animal.

When used as directed, MLS #12 IGR Tub will provide sufficient (S)-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season.

ACTIVE INGREDIENT:

*(S)-METHOPRENE (CAS #65733-16-6) -----0.01%

OTHER INGREDIENTS-----99.99%

* As the Insect Growth Regulator ALTOSID[®]

Beginning January 1, 2018, vitamin A,D & E levels are subject to change due to price and availability.
