This product is made in a feed manufacturing facility that DOES NOT handle or store products containing animal proteins prohibited in ruminant feed.

Little Fly  
**BIG PROBLEM**

High levels of copper. Do not feed to sheep.

Cattle should consume an average of 0.8 ounces of MLS #8 IGR Tub per 100 lbs. of animal body weight per day, which is equivalent to 8 ounces per day for a 1,000 pound animal.

When used as directed, MLS #8 IGR Tub will provide sufficient (S)-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season.

ACTIVE INGREDIENT:
